LOWER BODY MACHINES

KEISER® ENGINEERING
HUMAN PERFORMANCE™

SQUAT LIKE A PRO

Since the A300 Squat is our most popular piece in the world of sport and since the athletes training on it have gotten stronger, faster, and more powerful, we needed to build them a Squat that would perform under the demands of their body mass and explosive power. The Squat Pro has all the features of our standard Squat plus we've added a movable stop to make it easier to enter and exit the machine. We've also beefed-up the frame and added 200 extra pounds of weight in the base to help hold it in place. You may still want to bolt this machine to the floor for your largest and most powerful athletes.

KEISER DYNAMIC VARIABLE RESISTANCE

Keiser's **Dynamic Variable Resistance** is designed to provide a smooth consistent Variable Resistance force curve at any training speed. Each machine has its own unique Variable Resistance curve designed and tuned perfectly for the muscles being used in that particular exercise. For users, this means that working out any speed, you'll always be training at maximum efficiency.

Visit [keiser.com](https://www.keiser.com) for more information.

FEATURES

- Increased resistance range for more intense functional workouts
- Frame is 200 pounds heavier than the A300 for added stability
- Movable stop for greater ease of entering and exiting machine
- Smooth Keiser **Dynamic Variable Resistance**
- Fully adjustable to accommodate a wide range of users
- Bilateral movement for body symmetry training
- Large digital displays with resistance and counted repetitions

SPECIFICATIONS

HEIGHT: 70" / 1778 mm

WIDTH: 32" / 813 mm

DEPTH: 60" / 1524 mm

WEIGHT: 700 lbs / 318 kg

RESISTANCE:

40 - 700 lbs / 18 - 318 kg
